

# hosting

**100%  
UPTIME  
DUAL  
MIRROR**

Our website hosting is different to everyone else's. It's lovingly designed to be **fail proof**.

**Reliable, fault-redundant hosting** for 100% uptime and availability however busy your website becomes. Our state-of-the-art hosting facilities, based in Telehouse London (the most interconnected datacentre in the UK), provide **fast, secure hosting**. Our systems are managed around the clock with multiple power, link and failover protection. Backups are old-school - we live mirror sites to our secondary network and provide incremental backups so we have a copy of the site for the last 7 days and the last 4 weeks.

**Your site won't go down and that's guaranteed** - who else can promise that?

## WebPackNano

webhosting made simple  
for sites of 10 pages or less -  
Ideal for iWeb, small sites.  
(about 100 visitors per day)

## WebPacklite

Standard business host  
package with live mirror  
and incremental backups
