Just £13.99 per month

eShopPro - a complete e-commerce solution with WebPack Pro, fully configured for you (setup fee £150) **£ 299pa**

- As above but for shops with more products, 10 MySQL databases and more traffic and webspace for busier sites (about 100-10,000products)

Just £25.99 per month

How can I have a fully working and setup ecommerce site for £150 when other companies are looking for several hundred, if not thousands of pounds - and want more per month?

We keep things simple. We use a open source software called OScommerce which is free to use. It works by every company that uses it help in it's development. The setup takes about 3 or 4 hours so we simply charge for that time. We charge exactly what it says on the, erm, well, on this page.

OS Commerce is fully featured and much better than almost every other e-commerce solution that we've looked at. It powers thousands of online shops.

Full details and demo sites can be found at www.oscommerce.com
